WHAT IS CLOUD VPS AMD RYZEN?

VPS AMD Ryzen 9 9950X is a virtual server service powered by AMD's high-end CPU with outstanding performance, clock speeds up to 5.7GHz, plus DDR5 and PCIe 5.0 support.

Thanks to its modern architecture and high core/thread count, this VPS is ideal for demanding workloads such as web servers, rendering, software development and specialized applications, delivering high speed, stability and energy efficiency.

PEAK CLOCK SPEED – 5.7 GHZ AND WHY IT MATTERS TO USERS

- Ultra-fast response
- Instant heavy-task processing
- Game servers & automation tools
- A clear edge over regular VPS

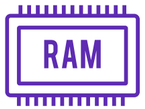

With a blazing 5.7GHz clock speed, Ryzen 9 9950X is a powerful choice for anyone who needs ultra-fast processing!

VPSTTT

COMBINING FIREWALL ANTI DDOS PRO WITH VPS AMD RYZEN 9 HELPS:

MAXIMUM PROTECTION FOR RYZEN 9 CPU PERFORMANCE

The firewall filters malicious packets and abnormal traffic first, reducing CPU load and keeping maximum resources for your main applications.

PREVENTS NETWORK CONGESTION AND RESOURCE EXHAUSTION

DDoS attacks hog CPU/RAM abnormally. Anti DDoS Pro blocks them at the network layer, preventing hangs even on a powerful Ryzen 9.

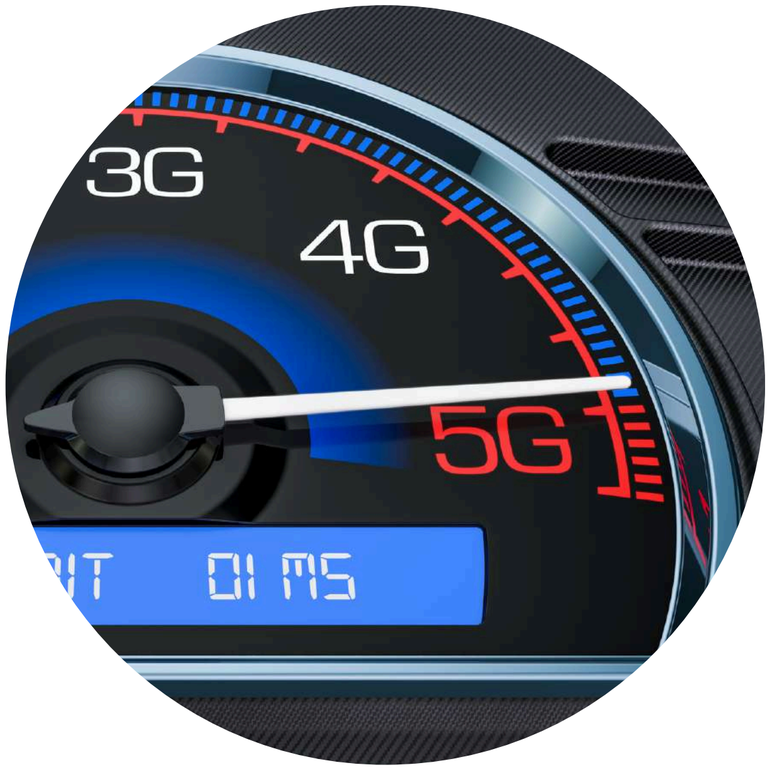

STABLE BANDWIDTH – CONSISTENTLY FAST RESPONSE

Ryzen 9 often powers VPS handling many connections (tools, proxies, APIs...). The Firewall keeps bandwidth clean and stable, avoiding slowdowns during attacks.

VPSTTT

10GBPS NETWORK SPEED FOR CLOUD VPS AMD RYZEN 9 AT VPSTTT

- Unleash the full multi-core, multi-thread power of Ryzen 9
- Ultra-fast transfer speeds – ideal for tools, proxies, APIs
- Greater efficiency combined with Anti-DDoS & Firewall
- Lightning-fast downloads, backups and syncs

VPSTTT

MAXIMIZE RYZEN 9 POWER WITH HIGH-SPEED STORAGE AT VPSTTT

- Make the most of Ryzen 9's multi-thread power
- Faster application startup and file access
- Concurrent access without bottlenecks
- Lower system latency
- High durability – built for 24/7 uptime

AUTO BACKUP – THE PERFECT PROTECTION LAYER FOR RYZEN 9 VPS AT VPSTTT

- Protects high performance from data loss risks
- Instantly restore your high-performance state
- Less downtime – processing speed preserved
- Automatic daily backups – protection against viruses and ransomware
- Suited for systems with large data volumes

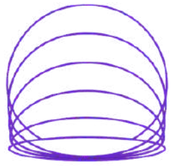

AMD RYZEN 9 9950X – THE BEST CHOICE FOR MINECRAFT GAME SERVERS

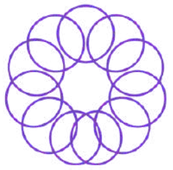

- Outstanding performance
- Optimized for Minecraft
- Fast data access
- Strong connectivity
- Stable and secure
- Lower cost, higher efficiency

WHAT IS CLOUD VPS AMD RYZEN USED FOR?

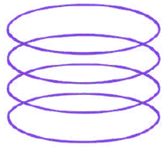

Cloud VPS AMD Ryzen is used to host, process and run applications, websites and online services flexibly, securely and reliably.

Run automation software and marketing tools 24/7

Set up a private Proxy Server or VPN

Host and run professional websites

Learning and research environment

Run your own game server

Run business management systems

VPSTTT

WHY CHOOSE CLOUD VPS AMD RYZEN AT VPSTTT?

OS

Wide range of operating systems

Automatic activation

Easy upgrades

Full admin privileges

WHAT MAKES VPSTTT'S AUTO BACKUP STAND OUT?

- Security
- Storage location
- Flexible restore
- Automatic schedules
- Data types backed up
- Number of backups
- Simple and easy to use

Integrated technology

- JetBackup / Rclone / Rsync (depending on the OS).
- Customers can turn backups on/off or create a manual backup at any time.

A UNIQUE ADVANTAGE AT VPSTTT - 140GBPS NETWORK INFRASTRUCTURE

01 **Ultra-fast file processing**

Upload / download large data (images, videos, AI datasets...) almost instantly

02 **Serve many concurrent connections without congestion**

Example: 1,000,000 users on web/proxy/game stay stable when optimized

03 **Ideal for livestreaming, cameras, AI streaming, render farms**

Sustain hundreds of Mbps continuously without exhausting network resources

04 **Well-suited for large-scale proxy reselling systems**

Easily handle thousands of concurrent connections given enough CPU/RAM

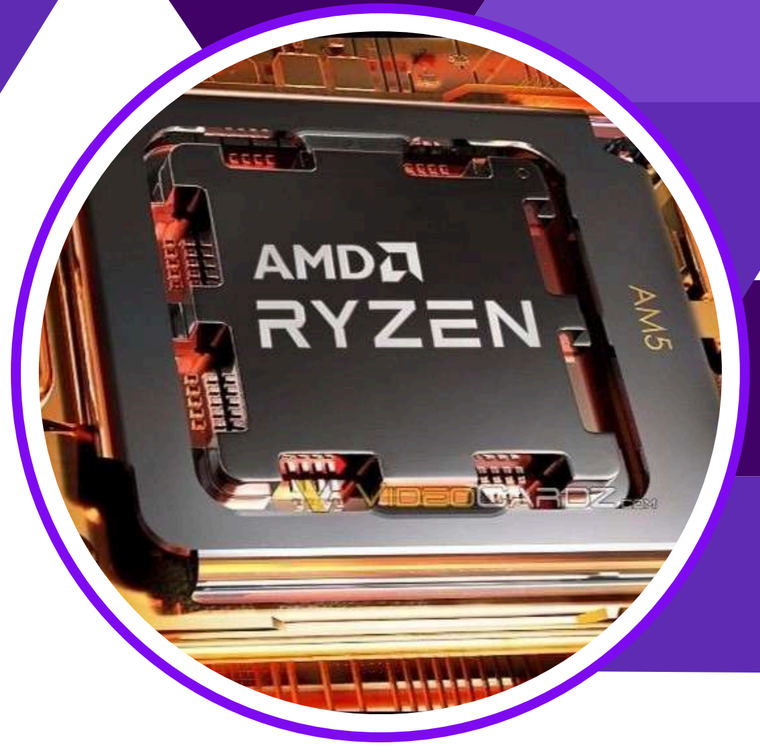

05 **Lower latency, faster service response**

Low ping, fast response, even for realtime APIs, CDNs or financial systems

VPSTTT

WIDE RANGE OF OPERATING SYSTEMS

VPSTTT's Cloud VPS AMD RYZEN supports a wide range of operating systems for servers (CentOS, Ubuntu Server, Windows Server) and desktops (Windows 7, Windows 8, Windows 10, Windows 11).

Centos

Ubuntu

RockyLinux

Windows

Debian

AlmaLinux

WHY TRUST CLOUD VPS AMD RYZEN 9 FROM VPSTTT?

7 YEARS +

Experience

12,000 +

Customers

12 +

Development partners

1,000 +

Successful projects

VPSTTT

FIREWALL ANTI DDOS FEATURES AT VPSTTT

International blocking

International block/unblock: VPSTTT lets customers block and unblock IPs anytime, anywhere.

Automatic DDoS detection and prevention

Detects and blocks DDoS attacks at the first sign of an attack.

Full connection monitoring

Lets network administrators monitor network activity.

24/7 technical support

VPSTTT helps you tailor the Firewall to your needs and respond quickly to new attack methods.

ARBOR APS - DEDICATED DDOS PROTECTION SOLUTION AT VPSTTT

WHAT IS ARBOR APS?

- Hardware DDoS protection appliance developed by Arbor Networks
- Deployed directly at the network infrastructure edge
- Real-time detection with automatic attack traffic filtering

ARBOR™ NETWORKS

KEY FEATURES

- Real-time DDoS detection (under 1 second)
- L3/L4/L7 traffic filtering
- Behavior analysis, machine learning
- ASN blocking, geo-blocking, BGP blackhole support
- Visual traffic monitoring dashboard, detailed logs

HIGH PERFORMANCE, AFFORDABLE PRICING

Powerful Cloud VPS AMD Ryzen 9 infrastructure with next-gen AMD/Intel CPUs and ultra-fast NVMe drives delivers remarkable performance for every need: from websites and applications to demanding backend systems.

No data migration needed – scale CPU, RAM and storage flexibly at any time to keep pace with your project's growth.
