VPSTTT

# WHAT IS DEDICATED SERVER USA?

Dedicated Server USA is a physical server hosted in US data centers, with all of its hardware resources reserved for a single customer.

Unlike a VPS on shared virtual resources, you configure the operating system, services, firewall, storage, backups and operating policies yourself.

VPSTTT recommends a configuration for your real workload: international websites, proxies, game servers, streaming, private cloud or systems needing US IPs.

**USA**
Servers hosted in US data centers

**Root**
Full root/admin access to your server

**24/7**
Help with setup, deployment and incidents

VPSTTT

# DEDICATED SERVER USA HIGHLIGHTS

1

## Top performance

Dedicated physical resources, never shared with other users.

2

## Global connectivity

For websites, apps, proxies and streaming that need global reach.

3

## US IP addresses

For projects needing US IPs or infrastructure near North America.

4

## Full administration

Install any OS, services, firewall and software you need.

5

## Private cloud

Install Proxmox or VMware ESXi and split resources into VMs.

6

## Remote operations support

Our engineers handle installs and hardware checks for you.

VPSTTT

# CONFIGURATIONS AND USE CASES

| | |
|---|---|
| **CPU** | Intel Xeon / AMD EPYC or custom |
| **RAM** | From 16 GB or custom |
| **Storage** | SSD / NVMe options |
| **Network** | High-speed international port, bandwidth on demand |
| **Operating system** | Linux / Windows / VMware ESXi |
| **Administration** | Full root/admin access |

## Great for

- Websites, APIs and SaaS for global users
- Proxies, streaming and data crawling
- Game servers and realtime services
- Virtualization and private cloud
- Systems needing US IPs and dedicated resources
