VPSTTT

WHAT IS STATIC RESIDENTIAL PROXY?

Static Residential Proxy uses a residential IPv4 address from a carrier in Vietnam that stays the same for the whole rental period, instead of a data center IP.

It suits accounts and workflows that need a carrier IP signal, must keep one address for a long time and should avoid changing login locations.

Proxies can be set up as HTTP(S) or SOCKS5, with Whitelist IP or User/Pass authentication, to fit many different environments.

Static
Same IP for the whole rental period

100Mbps
Network port, located in Vietnam

100+
Real static residential IPv4 addresses

STATIC RESIDENTIAL PROXY HIGHLIGHTS

1

Real residential IPs

IPv4 from end-user networks in Vietnam, not data center IPs.

2

Static for the whole term

Never rotates between sessions; ideal for accounts, stores, allowlists.

3

Private proxy

One fixed residential IP reserved for you, not shared with others.

4

HTTP(S) and SOCKS5

Pick the type when ordering; works with browsers, software and tools.

5

Whitelist IP or User/Pass

IP:Port or IP:Port:User:Pass format, easy to plug into your tools.

6

Cost-effective

Discounts by proxy quantity and rental period.
