VPSTTT

WHAT IS ROTATING RESIDENTIAL PROXY?

Rotating Residential Proxy uses residential IPv4 addresses from carriers in Vietnam; the IP changes per session instead of staying fixed.

It suits tasks that need a fresh carrier IP for each session and do not have to keep the same IP identity over time.

You choose FPT, VNPT or Viettel when ordering; proxies support HTTP(S) and SOCKS5, with Whitelist IP or User/Pass authentication.

Per session

A fresh residential IP each session

3

Carriers: FPT, VNPT or Viettel

100Mbps

Network port, HTTP and SOCKS5

VPSTTT

ROTATING RESIDENTIAL PROXY HIGHLIGHTS

1

IP changes per session

Each session can use a new residential IPv4.

2

Choose your carrier

Pick FPT, VNPT or Viettel right on the order page.

3

Vietnamese carrier IPs

Good for checking content served to users in Vietnam.

4

More flexible than static

No need to manage a fixed IP list by hand when tasks rotate constantly.

5

HTTP(S) and SOCKS5

Whitelist IP or User/Pass for browsers and tools.

6

Cost-effective

Discounts by quantity and rental period, 24/7 support.

VPSTTT
