WHAT IS DATACENTER IPV4 PROXY?

Datacenter IPv4 Proxy uses IPv4 addresses from data center infrastructure: fast, stable and well suited to tasks that need constant connections.

At VPSTTT it runs on a pool of dedicated, static Vietnamese IPv4 addresses that are not shared with other users, so sessions and IP history stay under your control.

Proxies support HTTP(S) and SOCKS5 with Whitelist IP or User/Pass authentication, for ads, SEO, MMO, automation and system testing.

10Gbps
Data center network port in Vietnam

20,000+
Dedicated, static, unique IPv4 addresses

Static
Same IP for the whole rental period

VPSTTT

DATACENTER PROXY HIGHLIGHTS

1

Dedicated IPv4

Each IPv4 goes to one customer for the rental period.

2

10Gbps port

Data center infrastructure in Vietnam, low latency.

3

Static for the whole term

Never changes between sessions; easy to allowlist.

4

Broad IPv4 compatibility

Works with websites and software that only accept IPv4.

5

HTTP(S) and SOCKS5

Whitelist IP or User/Pass authentication.

6

Cost-effective

Discounts by proxy quantity and rental period.

VPSTTT

SPECIFICATIONS AND USE CASES

IP type	Dedicated Vietnamese datacenter IPv4
IP mode	Static, not shared, no rotation
IP pool	More than 20,000 IPv4 addresses
Network port	10Gbps
Protocols	HTTP(S), SOCKS5
