VPSTTT

WHAT IS VNPT PROXY?

VNPT Proxy is a Vietnamese residential proxy with the VNPT carrier option in our order system. VPSTTT currently offers Shared and Rotating Residential for this carrier.

Shared proxies split each IP among up to 4 users to cut costs, while Rotating proxies change IP per session and are not meant to keep one fixed address.

VNPT is preselected on the product page and kept when you move to the order system, so your order records the carrier you chose.

VNPT
Carrier preselected when ordering

2 lines
Shared and Rotating Residential

100Mbps
Network port, HTTP(S) and SOCKS5

VPSTTT

VNPT PROXY HIGHLIGHTS

1

The right carrier

Orders are sent with the VNPT carrier option.

2

Two IP options

Shared to save costs, Rotating to change IP per session.

3

Check ASN and location

Verify IPs against your target platform before scaling.

4

HTTP(S) and SOCKS5

Whitelist IP or User/Pass authentication, by package.

5

Test before you scale

Start small, measure latency, then buy more.

6

Hands-on setup help

We help with protocol, authentication and tool setup.

VPSTTT
