VPSTTT

WHAT IS SERVER ADMINISTRATION?

Our server administration service helps businesses run their servers reliably without keeping an in-house IT team on duty around the clock.

VPSTTT handles installation, configuration, monitoring, hardware checks, troubleshooting and optimization advice at every stage of use.

The service suits businesses running dedicated servers, cloud servers or colocation that need a technical team by their side.

3 plans
Basic, Advanced and Intensive by server count

1-3
Servers supported in each plan

24/7
Monitoring and early warnings

VPSTTT

WHY CHOOSE VPSTTT SERVER ADMINISTRATION

1

Clear hardware management

Track CPU, RAM, SSD, disk, network and part replacement history.

2

Multi-platform deployment

Install Linux, Windows Server, cPanel, aaPanel, Virtualizor and more.

3

In-depth expertise

Our engineers operate, troubleshoot and advise on networks and servers.

4

Smart 24/7 monitoring

Regular checks and early warnings on hardware or performance issues.

5

Security hardening

Review patches, firewalls, access rights and service ports.

6

Structured troubleshooting

Analyze logs, isolate the root cause and coordinate service recovery.

VPSTTT

PLANS AND USE CASES

Basic plan	Hardware admin, 1 server
Advanced plan	System administration, 2 servers
Intensive plan	Dedicated technician, 3 servers
OS installs	2, 15 or 50 times/month by plan
