VPSTTT

WHAT IS VPS LINUX?

VPS Linux is a virtual server running Linux with root access, so you can deploy web servers, databases, containers, VPNs, control panels or background services on the exact stack you need.

Choose Ubuntu, Debian, AlmaLinux, Rocky Linux, CentOS, Fedora, Oracle Linux, openSUSE or Scientific Linux in every plan; Ubuntu 22 is selected by default and can be changed before ordering.

Four hardware lines, Intel Platinum, AMD EPYC, Ryzen 9 and Intel Gold, cover cost-balanced setups, many parallel workers and single-core sensitive workloads.

9 distros

Linux distros preinstalled, Ubuntu 22 by default

10 Gbps

Network port, enterprise NVMe storage

24/7

Technical support, regular backups

VPSTTT

VPS LINUX HIGHLIGHTS

1

Many distributions

Images for 9 Linux distros; switch OS before ordering.

2

APT, DNF/RPM, Zypper

Pick the package ecosystem that matches your stack.

3

Broad stack support

Nginx, Apache, PHP, Node.js, Python, Java, Docker, databases.

4

Supported releases first

Use releases that still get security updates in production.

5

Enterprise NVMe

Fast reads and writes for websites, APIs, databases and logs.

6

Deployment support

VPSTTT checks image, network and setup; you keep full control.

VPSTTT

CONFIGURATIONS AND USE CASES

CPU lines	Intel Platinum 8272CL, AMD EPYC 7J13, AMD Ryzen 9 9950X, Intel Gold 6144
vCPU / RAM	1–96 vCPU, 1–256 GB RAM
Storage	Enterprise NVMe, 20–500 GB
Network speed	10 Gbps, dedicated IPv4/IPv6
Backups	Twice a week
Operating system	9 Linux distros, Ubuntu 22 by default

Great for

- Websites, APIs and databases
- Docker, CI/CD and automation
- Moving from hosting to VPS
- VPN, panels, background services
- Central management over SSH

VPSTTT

WHY CHOOSE VPSTTT?

Tier III data center infrastructure

Servers hosted in standard data centers with redundant power and cooling.

Fast setup, self-service

Order, pay and manage your services directly in the client area.

24/7 technical support

Our engineers are on duty around the clock via hotline, Zalo, Messenger and tickets.

Clear policies

Transparent service level agreement (SLA), refund and privacy policies.
