WHAT IS VPS WEBUZO?

VPS Webuzo is a virtual server set up for fast deployment of Webuzo 8.6, with its own CPU, RAM, storage and IP and full admin rights.

Webuzo is a hosting control panel that brings websites, domains, PHP, databases, SSL, cron jobs and backups into one interface, ideal for WordPress, business sites, agencies and anyone who prefers not to work only on the command line.

At VPSTTT you choose one of four hardware lines: Intel Platinum, AMD EPYC, Ryzen 9 or Intel Gold, and scale resources when needed.

v8.6
Webuzo 8.6 preinstalled on order

10 Gbps
Network port, enterprise NVMe storage

24/7
Technical support, regular backups

VPSTTT

VPS WEBUZO HIGHLIGHTS

1

Webuzo 8.6 preinstalled

A dedicated Webuzo 8.6 image; switch OS before ordering.

2

A panel for websites

Domains, PHP, databases, SSL and cron jobs in one interface.

3

WordPress, many domains

For individuals, agencies and businesses with many sites.

4

Full VPS rights kept

Work in the panel while keeping full server admin access.

5

Enterprise NVMe

Fast reads and writes for WordPress, landing pages and PHP.

6

Deployment support

VPSTTT checks image, network and setup; you keep full control.

VPSTTT
